The **Academy of Certified Hazardous Materials Managers (ACHMM)** is a hazardous materials professional organization that is comprised of 60 Chapters with over 8,500 members in 34 States, including the District of Columbia and Guam. In 2006, the first international chapter was formed in Bangalore, India. The Finger Lakes Chapter of the Academy of Certified Hazardous Materials Managers (FLACHMM) was formed in 1995.

Certified Hazardous Materials Manager - The CHMM designation / certification is earned by a professional who has demonstrated the competence and qualifications to handle the responsibility for the complex aspects of hazardous material management with regards to environmental and health and safety requirements.

The **Certified Hazardous Materials Practitioner (CHMP, pronounced "CHaMP")** is a credential established by the Institute of Hazardous Materials Management (IHMM) that provides recognition for the non-degreed individual who has at least 5 years of experience (or an AAS degree plus 3 years of experience) in the practice of handling hazardous materials in a wide variety of specialized activities associated with public health and safety, transportation, security, and environmental protection. The CHMP certification is related to IHMM's Certified Hazardous Materials Manager (CHMM) but focuses more on hands-on or workplace experience as a practitioner and less on the corporate management aspects of the field.

The Goals of the CHMM program are to:

- Provide credentialed recognition to hazardous materials professionals with specific levels of education, experience and competence
- Identify qualified hazardous materials managers to government, industry and academia
- Foster continued professional development
- Facilitate transfer of knowledge and experience

CHMM Certification is awarded by the **Institute of Hazardous Materials**

[Marcor Remediation](#)

- 2007: 2,538 Unique Visits
- 2006: 1,353 Unique Visits (June – December)

The CHMM® Program Is Re-Accredited by CESB

- Accredited by the Council of Engineering and Scientific Specialty Boards (CESB) since 1995
 - Now renewed through 2008.
- The CHMM designation remains one of a select few accredited credentials in the environmental profession.

CHaMP Program

- **Certified Hazardous Materials Practitioner**
 - Non-degreed individual
 - 5 years of experience (or an AAS degree plus 3 years of experience)
- **Certified Hazardous Materials Manager**
 - Degreed individual
 - 3 years of experience

The CHMP certification focuses more on hands-on or workplace experience as a practitioner and less on the corporate management aspects of the field.
